I. I. T. M. RESEARCH REPORTS

- Note on the turbulent fluxes of heat and moisture in the boundary layer over the Arabian Sea, Sinha S., August 1971, RR-002.
- Simulation of the spectral characteristics of the lower atmosphere by a simple electrical model and using it for prediction, Sinha S., September 1971, RR-003.
- Study of potential evapo-transpiration over Andhra Pradesh, Rakhecha P.R., September 1971, RR-004.
- Note on the turbulent fluxes of heat and moisture in the boundary layer over the Arabian Sea, Sinha S., August 1971, RR-002.
- Simulation of the spectral characteristics of the lower atmosphere by a simple electrical model and using it for prediction, Sinha S., September 1971, RR-003.
- Tibetan anticyclone and tropical easterly jet, Raghavan K., September 1972, RR-006.
- Theoretical study of mountain waves in Assam, De U.S., February 1973, RR-007.
- Dynamical parameters derived from analytical functions representing Indian monsoon flow, Awade S.T. and Asnani G.C., November 1973, RR-012.
- Meridional circulation in summer monsoon of Southeast Asia, Asnani G.C., November 1973, RR-014.
- Semi-annual pressure oscillation from sea level to 100mb in the northern hemisphere, Asnani G.C. and Verma R.K., August 1974, RR-017.
- Suitable tables for application of gamma probability model to rainfall, Mooley D.A., November 1974, RR-018.
- Dynamical parameters derived from analytical function representing normal July zonal flow along 87.5°E, Awade S.T. and Asnani G.C., May 1978, RR-022.
- Study of trends and periodicities in the seasonal and annual rainfall of India, Parthasarathy B. and Dhar O.N., July 1975, RR-023.
- Poisson distribution and years of bad monsoon over India, Mooley D.A and Parthasarathy B., April 1980, RR-027.
- Wind tunnel for simulation studies of the atmospheric boundary layer, Sivaramakrishnan S., February 1981, RR-029.
- Project report on multidimensional initialization for NWP models, Sinha S., February 1989, RR-042.
• Numerical experiments with inclusion of orography in five level P.E. Model in pressure-coordinates for interhemispheric region, Bavadekar S.N. and Khaladkar R.M., March 1989, RR-043.

• Application of a quasi-lagrangian regional model for monsoon prediction, Singh S.S. and Bandyopadhyay A., July 1990, RR-044.

• Fortran-77 algorithm for cubic spline interpolation for regular and irregular grids, Tandon M.K., November 1991, RR-046.

• Fortran algorithm for 2-dimensional harmonic analysis, Tandon M.K., November 1991, RR-047.

• 500 hPa ridge and Indian summer monsoon rainfall: A detailed diagnostic study, Krishna Kumar K., Rupa Kumar K. and Pant G.B., November 1991, RR-048.

• Documentation of the regional six level primitive equation model, Singh S.S. and Vaidya S.S., February 1992, RR-049.

• FORTRAN algorithm for divergent and rotational wind fields, Tandon M.K., November 1992, RR-052.

• Experimental set-up to estimate the heat budget near the land surface interface, Vernekar K.G., Saxena S., Pillai J.S., Murthy B.S., Dharmaraj T. and Brij Mohan, July 1993, RR-056.

• Deterministic chaos and numerical weather prediction, Selvam A.M., February 1994, RR-058.

• Universal spectrum for fluxes of energetic charged particles from the earth’s magnetosphere, Selvam A.M. and Radhamani M., June 1995, RR-063.
• Estimation of nonlinear kinetic energy exchanges into individual triad interactions in the frequency domain by use of the cross-spectral technique, Chakraborty D.R., August 1995, RR-064.

• Thermodynamics of the mixing processes in the atmospheric boundary layer over Pune during summer monsoon season, Morwal S.B. and Parasnis S.S., March 1996, RR-066.

• Some numerical experiments on roundoff-error growth in finite precision numerical computation, Fadnavis S., May 1996, RR-068.

• Fractal nature of MONTBLEX time series data, Selvam A.M. and Sapre V.V., May 1996, RR-069.

• Homogeneous regional summer monsoon rainfall over India: Interannual variability and teleconnections, Parthasarathy B., Rupa Kumar K. and Munot A.A., May 1996, RR-070.

• Development of simple reduced gravity ocean model for the study of upper north Indian Ocean, Behera S.K. and Salvekar P.S., November 1996, RR-072.

• Diagnostic model of the surface boundary layer - A new approach, Sinha S., February 1999, RR-079.

• Computation of thermal properties of surface soil from energy balance equation using force - restore method, Sinha S., February 1999, RR-080.

• Fractal nature of TOGA temperature time series, Selvam A.M. and Sapre V.V., February 1999, RR-081.

• Evolution of convective boundary layer over the Deccan Plateau during summer monsoon, Parasnis S.S., February 1999, RR-082.

• Numerical investigation on wind induced interannual variability of the north Indian Ocean SST, Behera S.K., Salvekar P.S. and Ganer D.W., April 1999, RR-085.

• Reduction of AGCM systematic error by Artificial Neural Network: A new approach for dynamical seasonal prediction of Indian summer monsoon rainfall, Sahai A.K. and Satyan V., December 2000, RR-088.

• Estimation of nonlinear heat and momentum transfer in the frequency domain by the use of frequency co-spectra and cross-bispectra, Chakraborty D.R. and Biswas M.K., August 2002, RR-094.

• Real time simulations of surface circulations by a simple ocean model, Reddy P.R.C., Salvekar P.S., Ganer D.W. and Deo A.A., January 2003, RR-095.

• Dynamical seasonal prediction experiments of the Indian summer monsoon, Mujumdar M., Krishnan R. and Satyan V., June 2003, RR-097.

• Thermodynamics and dynamics of the upper ocean mixed layer in the central and eastern ArabianSea, Gnanaseelan C., Mishra A.K., Thompson B. and Salvekar P.S., August 2003, RR-098.

• Measurement of profiles and surface energy fluxes on the west coast of India at Vasco-Da-Gama, Goa during ARMEX 2002-03, Sivaramakrishnan S., Murthy B.S., Dharamraj T., Sukumaran C. and Rajitha Madhu Priya T., August 2003, RR-099.

- Initialization experiments over Indian region with a limited area model using recursive digital filters, Badypadhyay S. and Mahapatra S., July 2004, RR-104
- Sensitivity of Indian monsoon rainfall to different convective parameters in the relaxed Arakawa-Schubert scheme, Pattanaik D.R. and Satyan V., October 2004, RR-105
- Simulation of tropical Indian ocean surface circulation using a free surface sigma coordinate model, Prem Singh and Salvekar P.S., December 2004, RR-106
- Diagnostic analysis of wintertime rainfall events over the Arabian region, Mujumdar M.S., April 2006. RR-111
- Coupled multi model response of “Active” and “Break” phases of Indian summer monsoon to enhanced CO$_2$ effect, Mandke Sujata K., Sahai A.K., Shinde M.A., Joseph Susmitha and Chattopadhyay R., June 2006, RR-112
- An objective study of Indian summer monsoon variability using the self organizing map algorithms, Sahai A.K. and Chattopadhyay R., July 2006, RR-113
- Termination of Indian Ocean dipole event in an ocean general circulation model, Thompson Bijoy, Gnanaseelan C., Parekh Anant and Salvekar P.S., March 2007, RR-115
- Performance of NCMRWF models in predicting high rainfall spells during SW monsoon season - A study for some cases in July 2004, Khaladkar R.M., Narkhedkar S.G. and Mahan P.N., April 2007, RR-116
- OLR and Rainfall Variations Across India in Relation to Changing Global Atmospheric Thermal Conditions, Singh H.N., Singh Nityanand and Sontakke N.A., April 2007, RR-117
- Characteristics of Hydrological Wet Season over Different River Basins of India, Ranade Ashwini A., Singh Nityanand, Singh H.N. and N.A. Sontakke, September 2007, RR-119

Climatic and Hydroclimatic Features of Wet and Dry Spells and their Extremes across India, Nityanand Singh , Ashwini A. Ranade, August 2009, RR-122

Alarming Rise in the Number and Intensity of Extreme Point Rainfall Events over the Indian Region under Climate Change Scenario, R.M. Khaladkar, P.N. Mahajan, J.R. Kulkarni, August 2009, RR-123

Examining Indian Monsoon Variability in Coupled Climate Model Simulations and Projections, Ashwini Kulkarni, R.H. Kripalani, S.S. Sabade, February 2010, RR-125

Large-scale wet spell and spatio-temporal rainfall extremes over India during 1951-2007, Ashwini A. Ranade, Nityanand Singh, July 2010, RR-126

Scientific evaluation of air quality standards and defining air quality index for India, G. Beig, Sachin D. Ghude, Aparna Deshpande August 2010, RR-127

Performance of an ensemble prediction system based on CSV2 for the extended range prediction of active-break spells of Indian summer monsoon rainfall during 2011, Abhilash S., Susmitha Joseph, R. Chattopadhyay, S. Pattnaik, P. Murali Krishna, S. Dey, A.K. Sahai, B.N. Goswami, December 2012, RR-128

The importance of coupled sea surface temperatures to the Northward propagation of summer monsoon intraseasonal oscillation, Mandke Sujata K., Shinde M.A., A.K. Sahai, March 2013, RR-129

Evaluation of Extended Range Forecast Skill on Subdivisional Scale over India, Joseph Susmitha, Sahai A.K., Phani R., Mandal Raju, Dey A., Chattopadhyay Rajib, May 2017, RR-137

A Comparison of Extended-Range Prediction of Monsoon in the IITM-CFSv2 with ECMWF S2S Forecast System, Chattopadhyay Rajib, R. Phani M.K., Joseph Susmitha, Dey Avijit, Mandal Raju, Sahai A.K., January 2018, RR-139

The vertical wind tunnel facility at IITM - A review of laboratory experiments on cloud microphysic, A.K. Kamra, Rohini Bhalwankar and C.G. Deshpande, March 2018, RR-140

The 10-20 day intraseasonal variation of the South Asian summer monsoon simulated by GFDL models in the AMIP experiment of CMIP5, Sujata K. Mandke, Prasanth A. Pillai and A.K. Sahai, June 2018, RR-142

Spatial Patterns of Subseasonal Eddy Momentum and Heat Transport and its Probable Role in the Interannual Variability of Extratropical to Tropical Interaction during the Summer Monsoon Season, Mahesh Kalshetti, Rajib Chattopadhyay, Phani M. Krishna and A.K. Sahai, December 2018, RR-144

Initiative to Develop a Forecasting System for Wind Energy over a complex terrain in India using Weather Research and Forecasting (WRF) Model, Radhika Kanase, Greeshma Mohan, Madhuparna Halder, Medha Deshpande and P. Mukhopadhyay, May 2020, RR-147
